

SSI - Stabilize, Support and Improve

August 28-30, 2017

Omni Shoreham Hotel | Washington, D.C.

DFI is organizing a technical seminar on the effective application of deep foundations, ground improvement, and soil mixing for stabilization of slopes and excavation support.

The goal of the event is to provide presentations on current technologies, design concepts, research, and case histories for challenging slope and landslide repairs, excavation support and slope stabilization projects using deep foundation and ground improvement methods.
