Analysis and Design

Allowable Bearing Capacity of Strip Footings on Jointed Rock Masses: A Reliability Based Approach

B. Munwar Basha, K. Chandrakanth, and Arif Ali Baig Moghal

Numerical Simulation of Earthquake Induced Soil Liquefaction: Validation against Centrifuge Experimental Results

Zana Karimi and Shideh Dashti

On Foundations over Salt Encrusted Desert Flats (Sabkha): Properties, Challenges, and Guidelines

Waddah Akili

Settlement of a Shallow Foundation Resting on Piedmont Residual Soils of Northern Virginia

Behzad Amir-Faryar and Richard E. Finnen Jr.

Soil, Foundation, and Superstructure Interaction (I): Advanced Analyses of Shallow Foundations

Hany Farouk and Mohamed Farouk

Soil, Foundation, and Superstructure Interaction (II): Superstructure and Foundations' Tie Beams Analyses

Hany Farouk and Mohamed Farouk

Soil-Structure Interaction Effects on Seismically Isolated Nuclear Power Plants

Vasileios A. Drosos and Nicholas Sitar

Tactile Pressure Sensors in Centrifuge Modeling of Rocking Foundations

Panagiota Kokkali, Tarek Abdoun, and Ioannis Anastasopoulos

A Novel Method to Estimate the Compression Index for Gulf Coast Clayey Soil

Aging in Sand: Fatigue at Grain Contacts and Modeling Using Discrete Element Method

Zhijie Wang and Radoslaw L. Michalowski

Large Scale Simulation of Granular Materials via Impulse-Based Discrete Element Method

Seung Jae Lee, Youssef M. A. Hashash, and Eun Hyun Park

Model for Consolidation Analysis of Layered Soils under Depth-Dependent Loading

Hefu Pu and Patrick J. Fox

Modelling Ettringite Induced Heaving in Cement Stabilized Soils within a Chemo-Mechanical Constitutive Framework

Pawan Sigdel and Liang Bo Hu

Preliminary Study of Pore Water Chemistry Effect on the Physical and Mechanical Behaviour of Artificial Mixed Soil

T. W. Zhang, Y. F. Deng, S. Y. Liu, and D. W. Zhang

Response of Soil-Foundation-Structure Systems to Multidirectional Seismic Motion: A Micromechanical Approach

Usama El Shamy and Natasha Zamani

Settlement Estimations of Peat during Centrifuge Experiments

Riccardo Cappa, Samuel Yniesta, Anne Lemnitzer, Scott J. Brandenburg, and Ali Shafiee

Settlement of Embankment Constructed with Geofoam

B. Umashankar, S. Sasanka Mouli, and Chennarapu Hariprasad

Strain Rate Dependency of Sand Response under Uniaxial Monotonic Loading

Mohammed Baamer, Eduardo Suescun-Florez, Nikolaos Machairas, and Magued Iskander

Undrained Behavior of Sand by DEM Study

H. B. K. Nguyen, M. M. Rahman, and D. A. Cameron

Validation of a Numerical Model to Analyze Pile-Supported T-Walls

Alex Reeb, George Filz, Jehu Johnson, Richard Varuso, Panagiota Kokkali, Anthony Tessari, and Tarek Abdoun

Enhanced UniCone Expressions for Axial Pile Capacity Evaluation from Piezocone Tests

Fawad S. Niazi and Paul W. Mayne

Probabilistic Seismic Design of Soil-Pile Raft-Superstructure System

Biplab Das, Rajib Saha, and Sumanta Haldar

Service Limit State Design for Individual Drilled Shafts in Shale Using *t-z* Method

Thuy Vu and J. Erik Loehr

State of Practices in Databases for Deep Foundation Load Tests

Naser Abu-Hejleh, Murad Abu-Farsakh, Muhnnad T. Suleiman, and Ching Tsai

The ICP Design Method and Application to a North Sea Offshore Wind Farm

Richard J. Jardine, Andrew S. Merritt, and Felix. C. Schroeder

Using Cone Penetration Testing to Predict the Capacity and Drivability of Tapered Piles in Sands

Terrence Carroll and Shuang Hu

Finite Element Analysis for Spatially Stochastic Soil—Anisotropic Studies

H. B. K. Nguyen and M. M. Rahman

Numerical Investigation of Group Anchors

Buse Emirler, Selçuk Bildik, and Mustafa Laman

Response of Beams on Nonlinear Foundation

S. Haldar and D. Basu

R-LRFD: Robust Load and Resistance Factor Design

Wenping Gong, Sara Khoshnevisan, Hongwei Huang, C. Hsein Juang, and Jie Zhang

Soil-Structure Interactions in a Skewed Integral Abutment Bridge

Karrthik Kirupakaran, Kanthasamy K. Muraleetharan, and Gerald A. Miller

Streamlining of Bridge Pier as a Scour Countermeasure: A Feasibility Study

Junhong Li, Junliang Tao, and Xiong (Bill) Yu

Visualizing the Shallow Failure Mechanism of the T-Bar Penetrometer

Jeff F. Wallace, Christopher M. Chini, Cassandra J. Rutherford, and Joshua M. Peschel

Evaluation of Moisture Susceptibility and Healing Properties of Nanoclay-Modified Asphalt Binders

Zahid Hossain, Musharraf Zaman, Mrinal C. Saha, and Takumi Hawa

In-Place Recycling Moisture-Density Relationships for High-Traffic Applications

Ben C. Cox, Isaac L. Howard, and Randy Battey

Investigation of Rheological Properties of Asphalt Rubber toward Sustainable Use of Scrap Tires

Biswajit Bairgi, Zahid Hossain, and Robert D. Hendrix

Merits of Asphalt Concrete Durability and Performance Tests When Applied to Cold In-Place Recycling

Ben C. Cox and Isaac L. Howard

Pavement Repairs' Long-Term Performance over Expansive Soil

Samer H. Dessouky

Recent Discussions of p - y Formulations for Lateral Load Transfer of Deep Foundations Based on Experimental Studies

Camilla Favaretti, Anne Lemnitzer, Armin W. Stuedlein, and John Turner

Response of Resilient Modulus to Moisture Variation in Unsaturated Subgrade Soils

Ayan Mehrotra, Murad Abu-Farsakh, and Kevin Gaspard

Sustainable Alternatives in Low Volume Road Base Course Applications Evaluated through Accelerated Pavement Testing

Hasan Kazmee, Debakanta Mishra, and Erol Tutumluer

Use of Fluidized Bed Combustion Ash in Full Depth Reclamation

Shervin Jahangirnejad, Dennis Morian, Barry Scheetz, and Mansour Solaimanian

Vertical Pressures Produced by Controlled Low Strength Material (CLSM) Poured into Pipe Trenches

Medji Sama, David W. Sykora, and Antonios Vytiniotis

Gerald Verbeek, David Tara, and Peter Middendorp

Theory on Measuring Orientation with MEMS Accelerometers in a Centrifuge

Ryan D. Beemer, Madhuri Murali, Giovanna Biscontin, and Charles Aubeny

Thermal Activity of Geosynthetic Reinforced Soil Piers

Michael Adams, Jennifer Nicks, and Thomas Stabile

Using Thermal Integrity Profiling to Confirm the Structural Integrity of Foundation Applications

George Pisciacko, Dean Cotton, Daniel Belardo, and Garland Likins

Visualizing the Fundamental Physics of Rapid Earth Penetration Using Transparent Soils

Zhibo Chen, Mehdi Omidvar, Magued Iskander, and Stephan Bless

Sustainability

Behaviour of Reinforced Stone Dust Model Walls under Uniformly Distributed Loading

Sumitra S. Kandolkar and J. N. Mandal

Characterization and Surface Analysis of Commercially Available Biochars for Geoenvironmental Applications

Erin N. Yargicoglu and Krishna R. Reddy

Influence of Physico-Chemical Properties of Different Biochars on Landfill Methane Adsorption

Bala Yamini Sadasivam and Krishna R. Reddy

Laboratory Study of Electromagnetically Induced Contaminant Removal

Vahab Bolvardi, Arvin Farid, Atena Najafi, Jim Browning, and Elisa Barney Smith

Macropore Flow Modeling Using the Root Zone Water Quality Model

Duraisamy S. Saravanathiiban and Milind V. Khire

Optimum Dimensions of Reinforced Soil Berm for Vertical Expansion of Municipal Solid Waste (MSW) Landfills

B. Munwar Basha, Shilpi Mahapatra, and Bappaditya Manna

Phytoremediation of Mixed Contaminated Soils: Enhancement with Biochar and Compost Amendments

Reshma A. Chirakkara and Krishna R. Reddy

Structural Effects on Effective Conductivity of Compacted Clays

Wassim E. Tabet and Amy B. Cerato

An Overview of Sustainability Applied to Earth Structures

Daniel R. VandenBerge, Alan J. Esser, and Kristi Bumpas

Beneficial Reuse of Fine Grained Soils for Port, River, and Shoreline Applications

Mohammed O. A. Bazne, Farshid Vahedifard, and Isaac L. Howard

Beneficial Reuse of Waste Insulation Material in Drilling Applications

Madison Bertoch, Nazli Yesiller, and James L. Hanson

Carbon Footprint of Tuttle Creek Dam Seismic Retrofit

Patricia M. Gallagher, Adam Cordi, and Sabrina Spatari

Effect of Compost Soil Treatment on Surficial Slope Stability in Fully Softened Condition

Minh Le, Anand J. Puppala, and Aravind Pedarla

Effect of pH on the Leaching of Elements from Highway Base Layers Built with Recycled Concrete Aggregates

Janile Lewis, Bora Cetin, and Ahmet H. Aydilek

Geotechnical Properties of Lightly Stabilized Recycled Demolition Materials in Base/Sub-Base Applications

Alireza Mohammadinia, Arul Arulrajah, Jay Sanjayan, Mahdi M. Disfani, Myint Win Bo, and Stephen Darmawan

Improving the Shear Strength of Soils by Adding Agricultural By-Products

Karen Schaefers and Soonkie Nam

Investigation on Clogging Potential of Recycled Concrete Aggregate in French Drain Systems

Boo Hyun Nam, Zachary Behring, Manoj Chopra, John Shoucair, and Soonkie Nam

Recycling of Municipal Solid Waste Incineration (MSWI) Ash as Aggregate Replacement in Concrete

Baig Abdullah Al Muhit, Jinwoo An, and Boo Hyun Nam

Soil Crust Development throughout a Two-Dimensional Profile by Discrete Element Method

Seungcheol Yeom and Kurt J. Sjoblom

Steel Slag: Chemistry, Mineralogy, and Morphology

Irem Zeynep Yildirim and Monica Prezzi

Stormwater Sediment Filtration Using Sand versus Synthetic Fibers

Milind V. Khire, Duraisamy S. Saravanathiiban, Mark Verwiell, Christopher Prucha, and Terry Johnson

Sustainability Assessment of Two Alternate Earth-Retaining Structures

Rajiv K. Giri and Krishna R. Reddy
