

TABLE OF CONTENTS

1.	INTRODUCTION	1
2.	CAPACITY OF A SINGLE PILE	1
2.1	Load-Transfer Mechanism – Shaft Resistance	2
2.2	Load-Transfer Mechanism – Toe Resistance	5
2.3	Capacity Determined from In-Situ Testing	6
2.4	Installation Considerations	7
2.5	Soil Set-up and Resistance at EOID and RSTR	7
2.6	Residual Compression	8
2.7	The Neutral Plane	8
3.	CAPACITY OF A PILE GROUP	11
4.	SUMMARY OF DESIGN PROCEDURE FOR CAPACITY	11
5.	SETTLEMENT OF PILE FOUNDATIONS	13
5.1	Introduction	13
5.2	Conventional Approach	13
5.3.	The Janbu Tangent Modulus Approach	15
5.4	Calculation of Pile Group Settlement Calculation	19
5.5	Summary of Settlement Calculation	19
6.	STRUCTURAL DESIGN OF PILES	21
6.1	Introduction	21
6.2	Allowable Stresses During Driving	21
6.3	Allowable Load During Service Conditions	22
7.	EXAMPLES	23
7.1	Example 1	23
7.2	Example 2	26
7.3	Example 3	30
7.4	Example 4	34
7.5	Example 5	41
8.	REFERENCES AND BIBLIOGRAPHY	44
