

Editorial Summary

DEEP FOUNDATIONS magazine is the publication of the Deep Foundations Institute, the interdisciplinary association which provides a forum to discuss the technical issues and concerns unique to the field of deep foundation design and construction.

The purpose of the magazine is as follows:

- To keep DFI members up-to-date on the ongoing and upcoming events and activities of the Institute and its technical committees
- To provide information on new techniques, products and technology in the industry
- To provide news on the leading corporations and individuals in the industry
- To announce upcoming industry events

Also included in each issue is a centerfold technical article, a cover story on an outstanding industry foundation project, a section dedicated to information from DFI Europe, a section titled FHWA Forum bringing new developments from the Federal Highway Administration as well as editorials by the DFI President, DFI Executive Director and the Executive Vice President of the ASFE.

The magazine is published quarterly: Winter, Spring, Summer & Fall
