

in partnership with

SuperPile'19

piling design & construction conference
Seattle, Washington

May 1-3, 2019 ■ Sheraton Seattle Hotel

**This three-day event will include presentations*
on the latest developments in:**

- Augered Cast-in-Place and Drilled Displacement Piles
- Drilled Shafts
- Driven Piles
- Ground Improvement (related to piling)
- Helical Piles and Tiebacks
- Marine Foundations
- Micropiles
- Seismic and Lateral Loads
- Testing and Evaluation
- Innovations and advancements in pile design and installation
- Corrosion of buried structures
- Designing and constructing safely and effectively in urban environments
- Instrumentation, load testing, monitoring
- Designing for resiliency under extreme or unexpected loading conditions (inclement weather, tsunami, flooding, seismic, liquefaction, lateral spreading)
- Sensitivity during construction in various types of aquatic environments
- Trends in design and construction methods for highway infrastructure projects
- Foundation optimization through risk management (geotechnical, contractual, communication risks)
- Sustainable design approaches to address economic and ecological impacts

Conference Highlights*

- DFI Technical Committee Meetings
- WiDF Networking Reception
- Exhibit Hall with Over 70 Manufacturers, Suppliers and Service Providers
- Osterberg Memorial Lecture
- Presentation of the Ben C. Gerwick Award for Innovation in the Design and Construction of Marine Foundation
