

in partnership with

# SuperPile'19

piling design & construction conference  
Seattle, Washington

**May 1-3, 2019 ■ Sheraton Seattle Hotel**

## **DFI is soliciting presentations for SuperPile '19 on the following topics:**

- Augered Cast-in-Place and Drilled Displacement Piles
- Drilled Shafts
- Driven Piles
- Ground Improvement (related to piling)
- Helical Piles and Tiebacks
- Marine Foundations
- Micropiles
- Seismic and Lateral Loads
- Testing and Evaluation

## **Topics and case histories, including (but not limited to):**

- Innovations and advancements in pile design and installation
- Corrosion of buried structures
- Designing and constructing safely and effectively in urban environments
- Instrumentation, load testing, monitoring
- Designing for resiliency under extreme or unexpected loading conditions (inclement weather, tsunami, flooding, seismic, liquefaction, lateral spreading)
- Contractual practices
- Sensitivity during construction in various types of aquatic environments
- Trends in design and construction methods for highway infrastructure projects
- Foundation optimization through risk management (geotechnical, contractual, communication risks)
- Working platforms
- Sustainable design approaches to address economic and ecological impacts

**To submit an abstract or for additional details, visit**
