# Helical Piles - Tiebacks - Anchors

## TRADESHOW & EDUCATIONAL SEMINAR

Hamilton County Fairgrounds | Cincinnati, Ohio

### Type A Exhibits - Structured Demonstrations on a First-Come, First-Served Basis

These exhibits are for companies that submit a demonstration abstract for the event. They will choose from the list of topics below and write a brief description of their plan. It will be made clear that there will not be any repeated topics, so interested parties are encouraged to submit more than one idea/topic, ranked by interest. This way your company can be selected, but maybe not for your first choice of topic. These booths are large enough to allow for these companies to have a full product display with promotional info and have space to perform their demonstration. These demonstrations will be part of the event program and everyone who attends will witness their demonstration. Company shirts/equipment/material brands will all be allowed in each exhibitor's demonstration.

To help correlate the outdoor event programs, the following groups of topics can be chosen for demonstrations:

- Above ground elevated foundations, boardwalks, walkways, decks
- Billboards, street lights, signs, bollards
- Pipe tiedowns, tiebacks, guy anchors, retaining walls
- Underpinning, foundation retrofit & repair
- New construction, bridge abutments, pile grouping
- Temporary structures, tents
- Wind turbines, solar panels
- Marine applications
- Limited Access Equipment / Methods
- "Helical 101": Intro to how helicals are designed and implemented
- Torque correlation and how it works
- Helical installation inspections / QAQC
- Load Testing

Companies are to submit an abstract using the following form for their demonstration choices. Up to three choices can be submitted, ranked in order of preference. Multiple topics can be combined. The best six ideas will be chosen. If there are more submissions than anticipated, more demonstration slots may be added. **Submit to [cplanitzer@dfi.org](mailto:cplanitzer@dfi.org).**
